## ELSURFAC™- ELA7 (Lauryl Alcohol Ethoxylated)

### Specification Sheet

|                   |                                                                                   |
|-------------------|-----------------------------------------------------------------------------------|
| Product           | : Lauryl Alcohol Ethoxylated                                                      |
| Code              | : 34021300                                                                        |
| Chemical Name     | : Lauryl Alcohol Ethoxylated                                                      |
| Synonyms          | : Polyoxyethylene lauryl ether, Laureth, Ethoxylated lauryl alcohol               |
| CAS No.           | : 68439-50-9                                                                      |
| Molecular Formula | : C <sub>12</sub> H <sub>26</sub> O(C <sub>2</sub> H <sub>4</sub> O) <sub>n</sub> |
| Molecular Weight  | : Varies depending on ethoxylation degree                                         |
| Boiling Point     | : Not applicable                                                                  |
| Density           | : 0.95 g/cm <sup>3</sup>                                                          |
| MeltingPoint      | : Not applicable                                                                  |
| Viscosity         | : Varies with ethoxylation degree                                                 |

#### No. CORE TESTS SPECIFICATION

- 1 Appearance : Clear to slightly hazy liquid
- 2 Packaging : 200kg HDPE drums

#### SHELF LIFE

At least 2 years

The information and data contained herein are believed to be accurate but may not be all inclusive and should only be used as a guide. The information is furnished upon the condition that the person receiving it shall make his own determination of the suitability of the product for his particular use and on condition that they assume the risk of the use thereof.
